

## **LO2 - Design and implement comprehensive test plans with instrumented code**

This document sets out the testing plan for the PizzaDronz software. This is based on both the functional and non-functional requirements set out in the LO1 Supporting Document.

### **Identifying our Priorities:**

Functional requirements as outlined in the L1 Supporting Document will have the highest priority as they are essential to the functionality of the software.

Non-functional requirements such as efficiency and performance will not take priority as they don't concern mandatory software features.

## **The Development Plan:**

**During development**
